

My name is Ron Mauer, age 75.

Some of my major interests have been flying small aircraft, solar energy, motorcycles, tiny houses, self reliance, amateur radio, metaphysics, energy healing and swing dancing.

My interest in metaphysical topics started in 1975 with a brief association with the Rosicrucian Order, then a move to Virginia Beach for a few months in 1977. During the 1990's my metaphysical interests were rekindled with information about ETs and how they influence world events. During that time period the ex and I hosted a Monday Night Meditation Group for a few years. We started with a healing circle, placing names in the center and everyone focused on that person and sending healing energy for a few moments. That was followed by a [Planetary Cleansing Guided Visualization](#), then followed by personal meditation. Ending that we shared any personal experience.

As with most people, most of my metaphysical abilities are dormant. My one crowning achievement was a detailed success with psychometry. I have bent a spoon, that was fun and clearly demonstrated the power of the mind.

Currently I use a healing modality called Matrix Energetics and I am interested in learning chair massage.

I have been swing dancing since around 1999.
